

Bugs: paramio module

The paramio module is the S–Lang parameter interface.

Bugs

1. *The `paccess()` function does not return a `NULL` when the parameter file can not be found.*

Instead, `paccess()` generates the following error message:

```
Type Mismatch: Unable to typecast Null_Type to Param_File_Type
```

Workaround:

The simplest workaround is to use the `paramgetpath()` routine instead.

The Chandra X–Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
