

CXC Links

- [The California-Harvard Astrostatistics Collaboration](#) - a collaboration between the Department of Statistics, UC-Irvine Department of Statistics, and the Harvard-Smithsonian Center for Astrophysics
- [Atomic Database \(ATOMDB\)](#) - describes emission from high-temperature collisional plasma and is accessible from *Sherpa*.
- [Calibration Database \(CALDB\)](#) - an indexed collection of public calibration products used by CIAO.
- [Instruments and Calibration](#) - information on the calibration of Chandra instruments, including products that have not yet been approved for the CALDB.
- [The Chandra Ray Tracer \(ChaRT\)](#) - a web interface that traces rays through the Chandra x-ray optics to produce point spread functions (PSFs).
- [Emission Line Project](#) - a collaboration to improve plasma spectral models using Chandra data.

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
60 Garden Street, Cambridge, MA 02138 USA.
