

CXC: Chandra X-ray Center

The Chandra X-ray Center in Cambridge, Massachusetts (USA) has been given by NASA the job of running the Chandra Observatory. This includes the following tasks:

- To run the proposal peer review that decides which observations should be recommended to NASA to be performed.
- To receive Chandra data from the NASA deep space network at its Operations Control Center (OCC), process the data (SDP) and distribute the products.
- To create and distribute the CIAO data analysis software.

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
60 Garden Street, Cambridge, MA 02138 USA.
