

---

## evt

---

Abbreviated name for the "event" data product. This name may be followed by a "1", "1a", or "2", depending on the type of product and the type of observation. In all cases, the file consists of a table of events, and their corresponding properties, as measured for that observation. This data product is typically distributed in the "primary" directory.

For more information, see the event entry or the Data Products Guide.
