Download CALDB 3

Go to: <u>Download Index</u> | <u>Solaris</u> | <u>Linux 6</u> | <u>Linux 8</u> | <u>OS X PowerPC</u> | <u>OS X Intel</u> | <u>ATOMDB</u>

CALDB 3.3.0 or higher is required for the proper operation of CIAO 3.4. Likewise, do not update to CALDB 3.5.0 unless you are using CIAO 3.4.

The <u>CALDB</u> is a fully functional, fully indexed, updated version of the same CALDB that is used in Chandra <u>standard data processing</u> (SDP); it includes all the calibration files required by CIAO. As explained in the README, the CALDB must be set up in a directory that is accessible from where CIAO will be used.

For more information on the CALDB, including <u>installation instructions</u>, visit the <u>CALDB website</u>.

Download the CALDB from the CALDB 3 site
