

How do I display a source list on my data?

With the event data displayed in ds9, load the region file from the ds9 menu "Regions" -> "Load Regions..." -> `s3_src.reg`. (`s3_src.reg` is an ASCII file.) If the source list is in FITS format, it's necessary to include the extension with the filename: `s3_src.fits[SRCLIST]`.

For more information on working with source lists, refer to the [Using the Output of Detect Tools thread](#).

The Chandra X-Ray Center (CXC) is operated for NASA by the
Smithsonian Astrophysical Observatory.
