What stars should HWO look at?

What habitable zone planets exist in high-energy environments like Earth?

229 nearby FGKM stars
Searched *Chandra* & *XMM-Newton*
archives

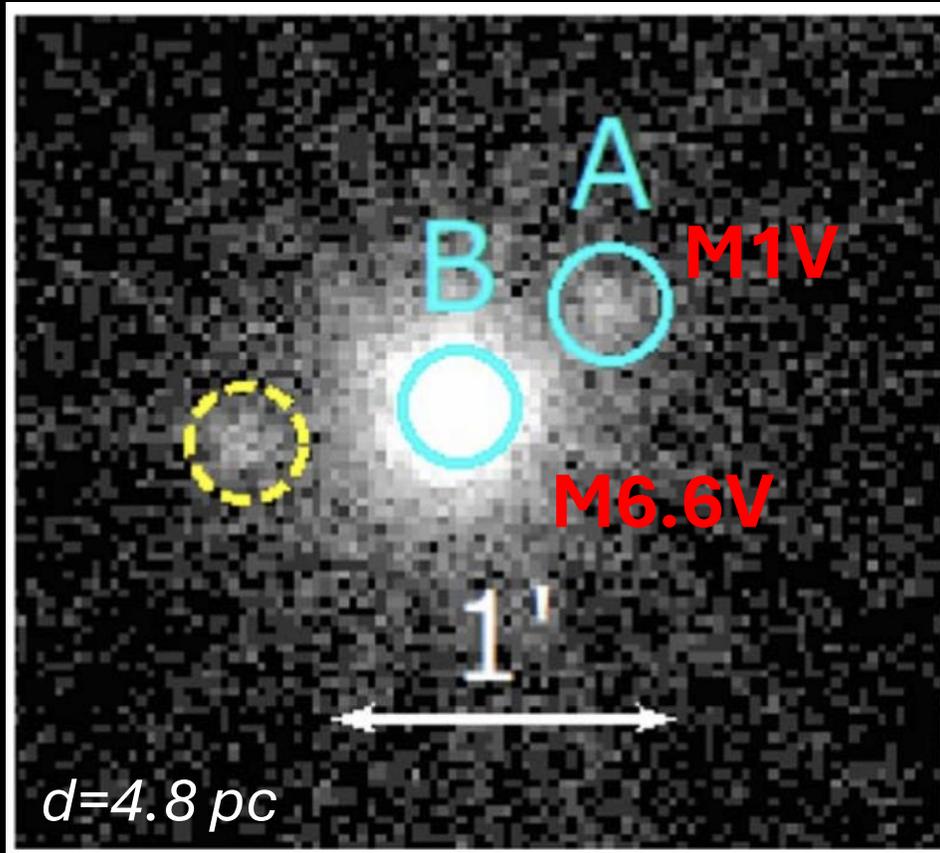

57 stellar systems contained within at
least one X-ray observation (~34 days)

Complements the MUSCLES/Mega-
MUSCLES survey (Brown et al. 2023)

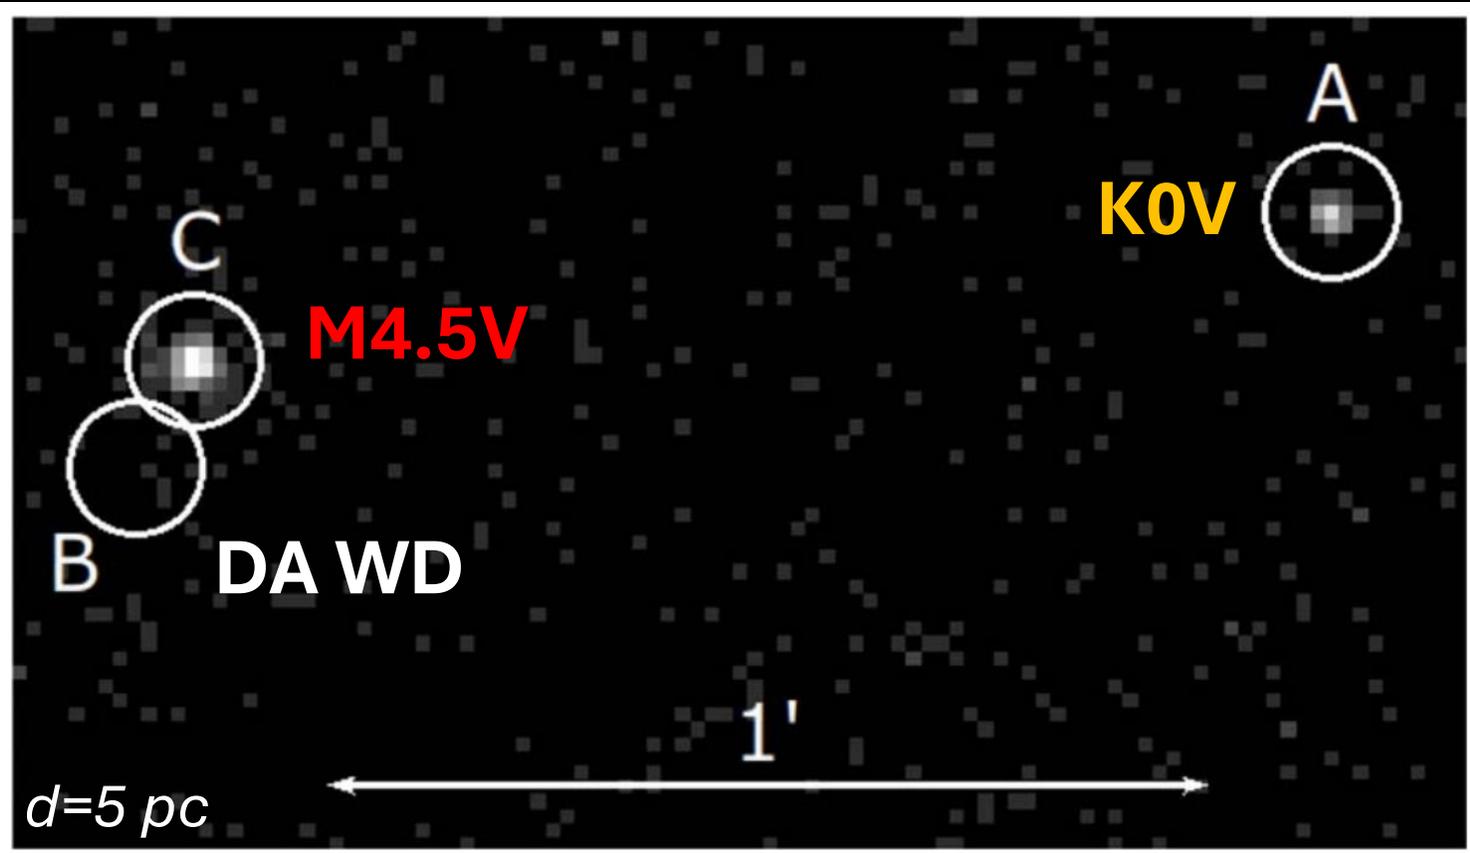

Binder et al. (2024), *ApJS*, 275, 1

Where *Chandra* shines

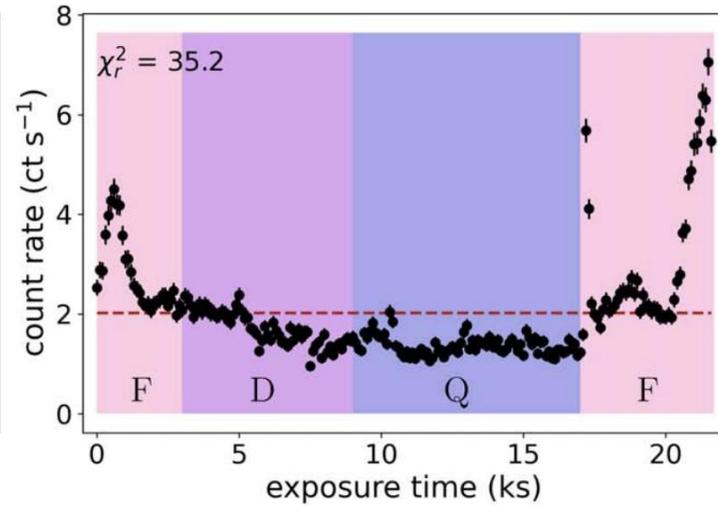

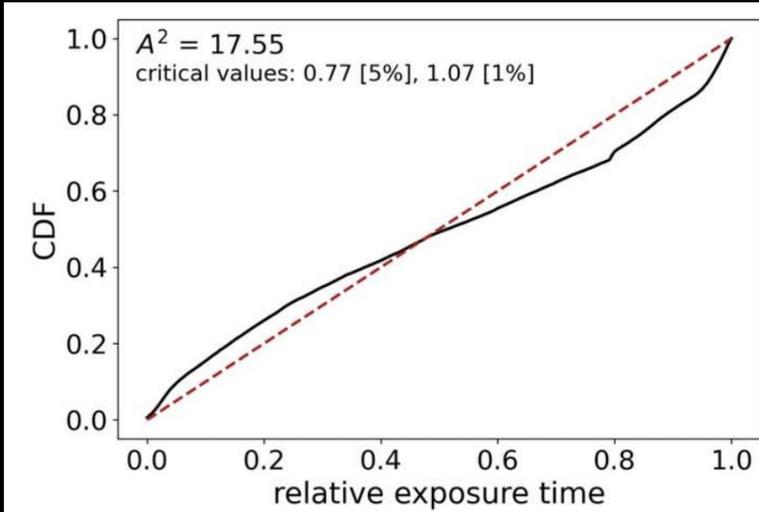

GL 412

40 Eri

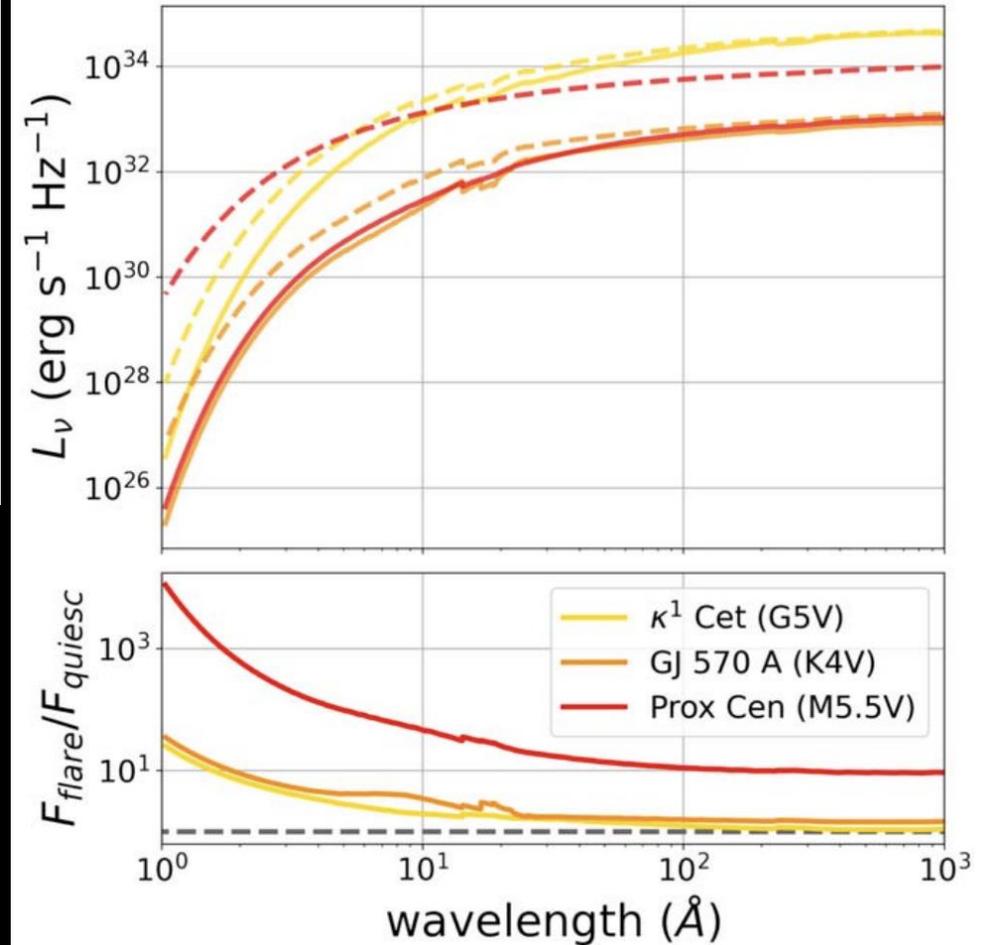

Variability and Spectroscopy

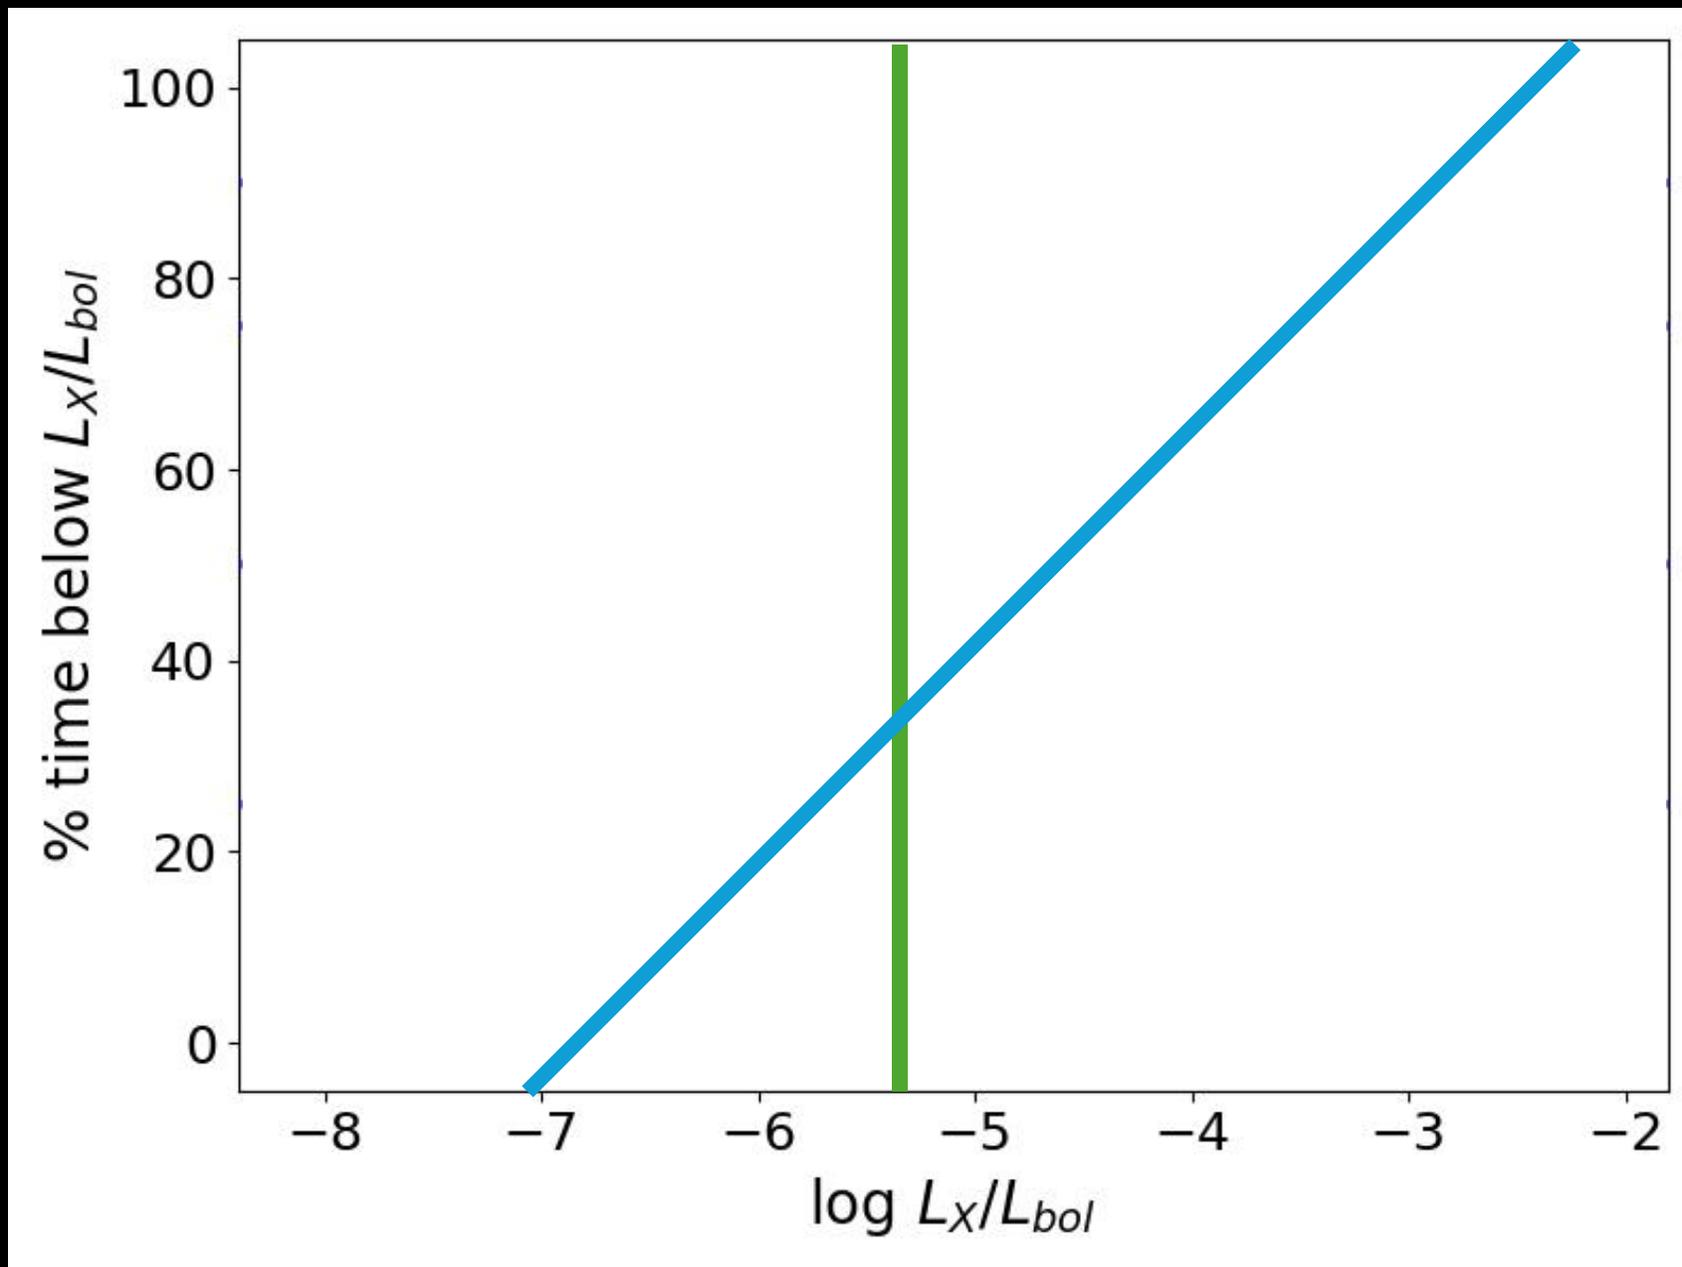

Proxima Centauri

M star environments are tough

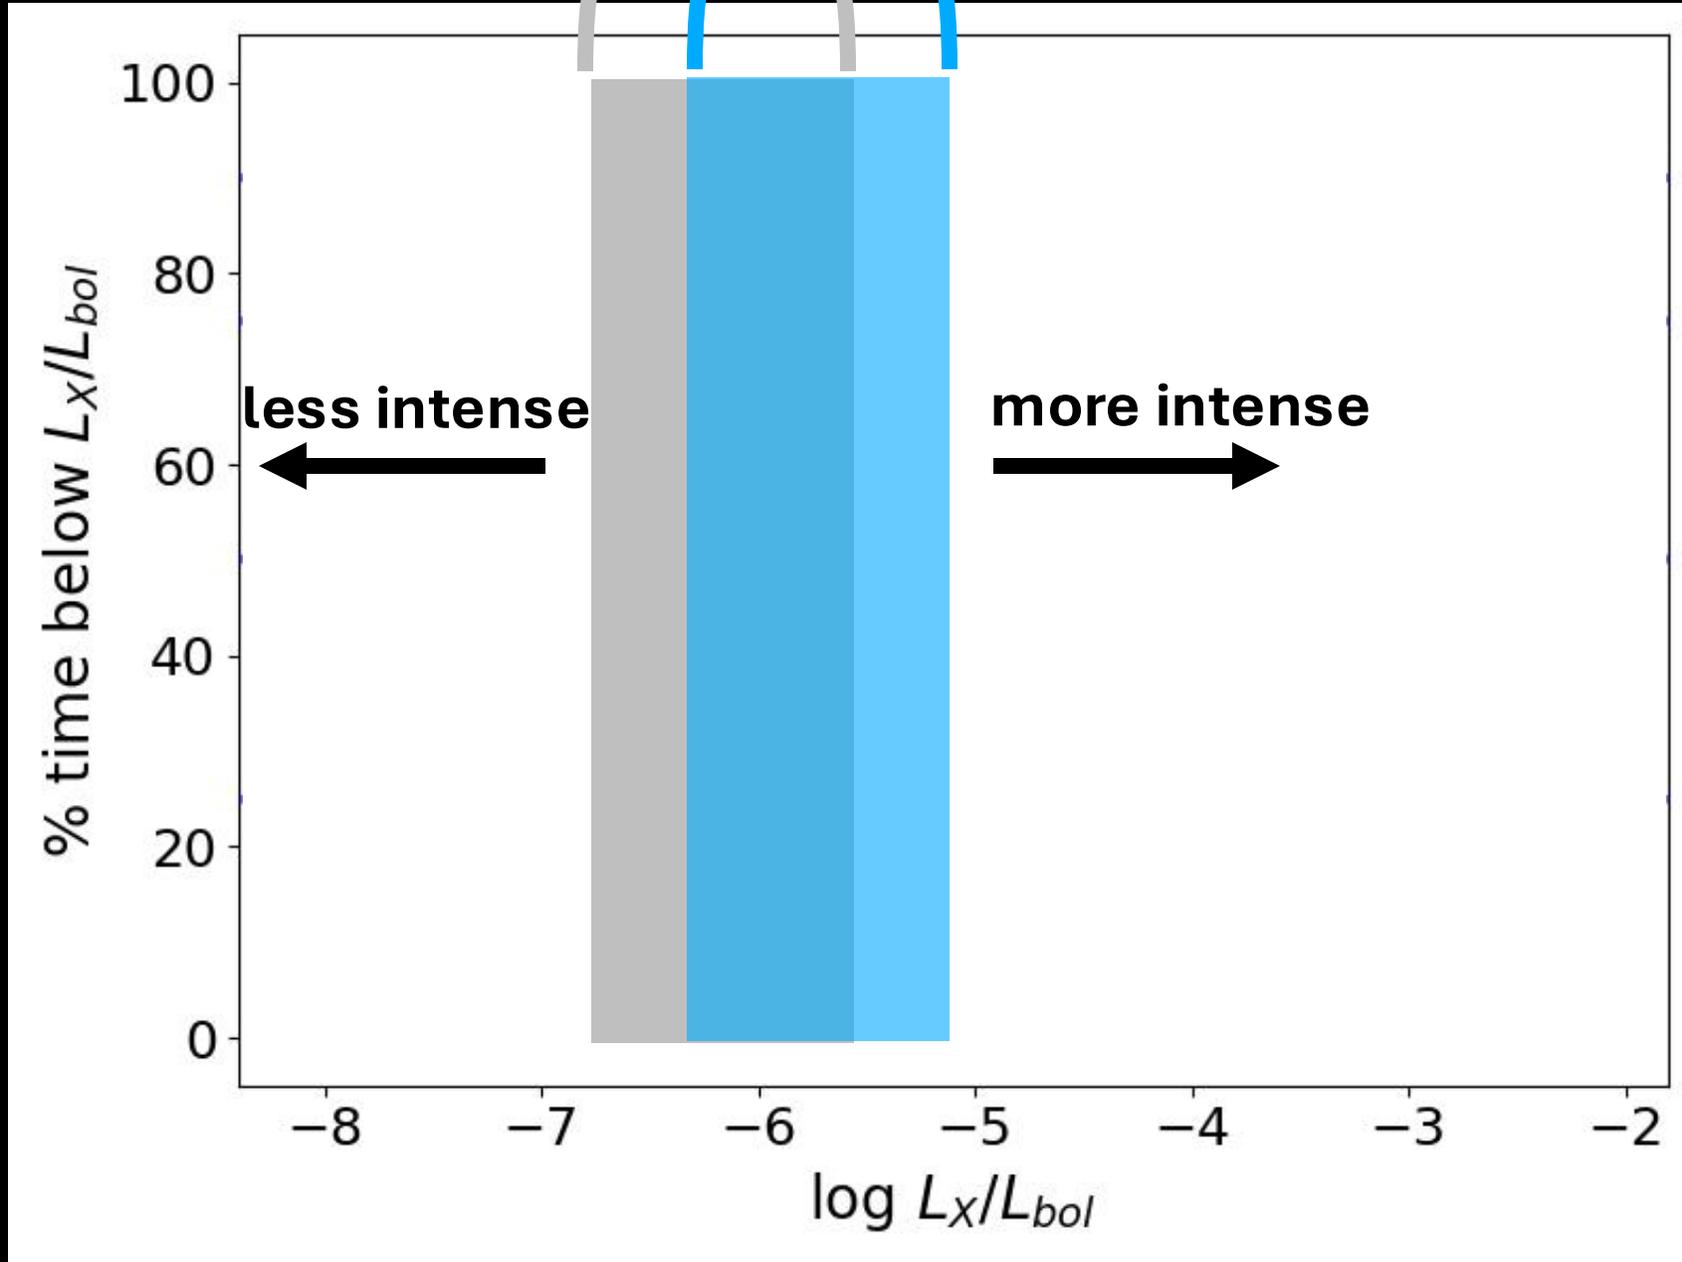

perfectly non-variable

variability/flaring

modern Sun

early Sun (~4 Gyr ago)

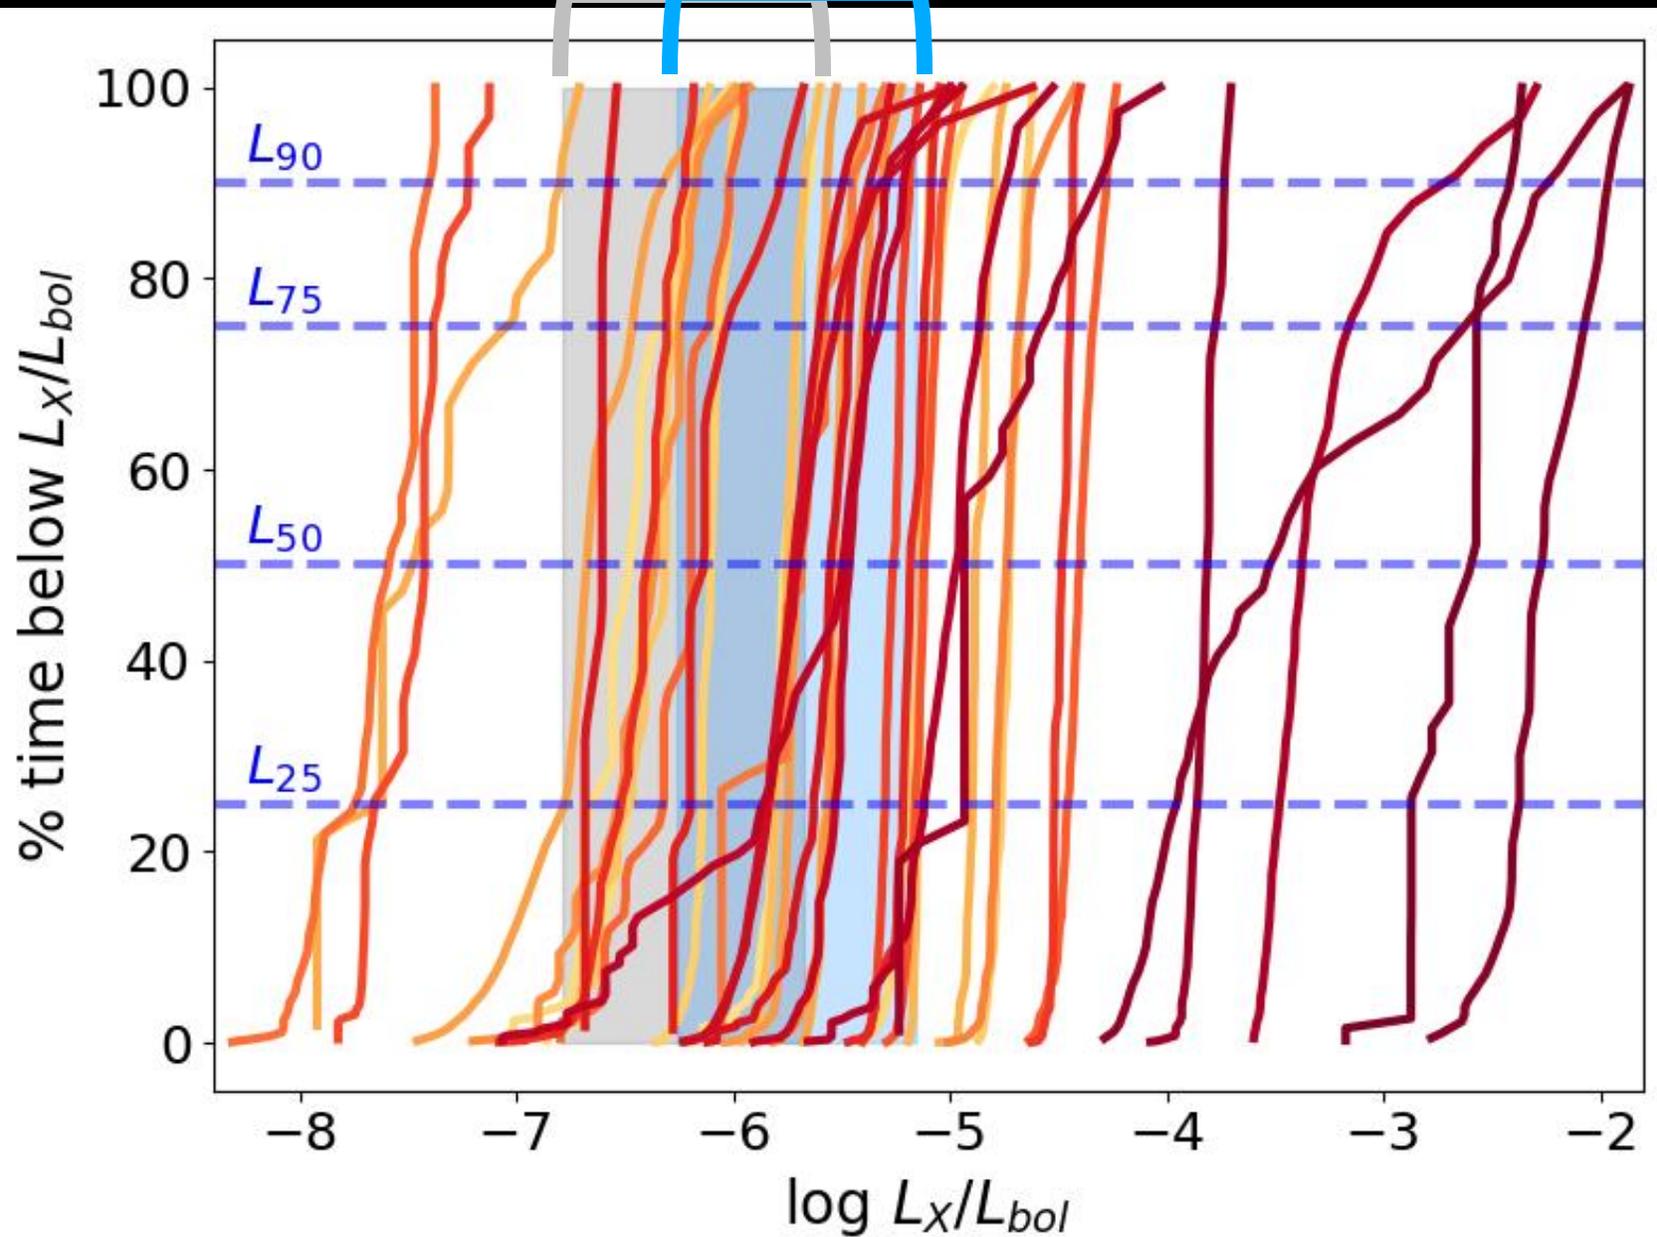

hotter than
the Sun

Sun-like

cooler than
the Sun

modern Sun

early Sun (~4 Gyr ago)

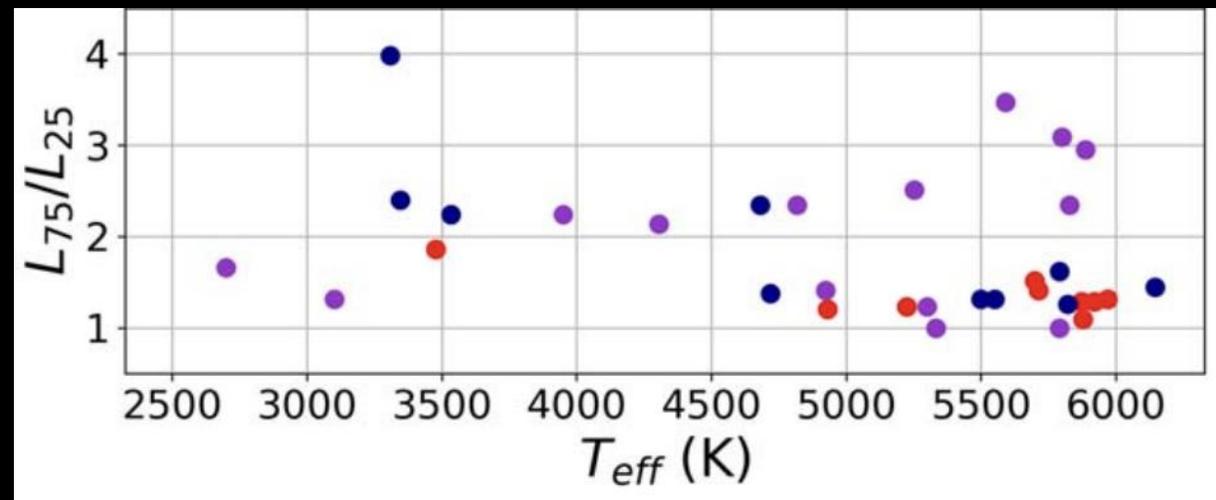

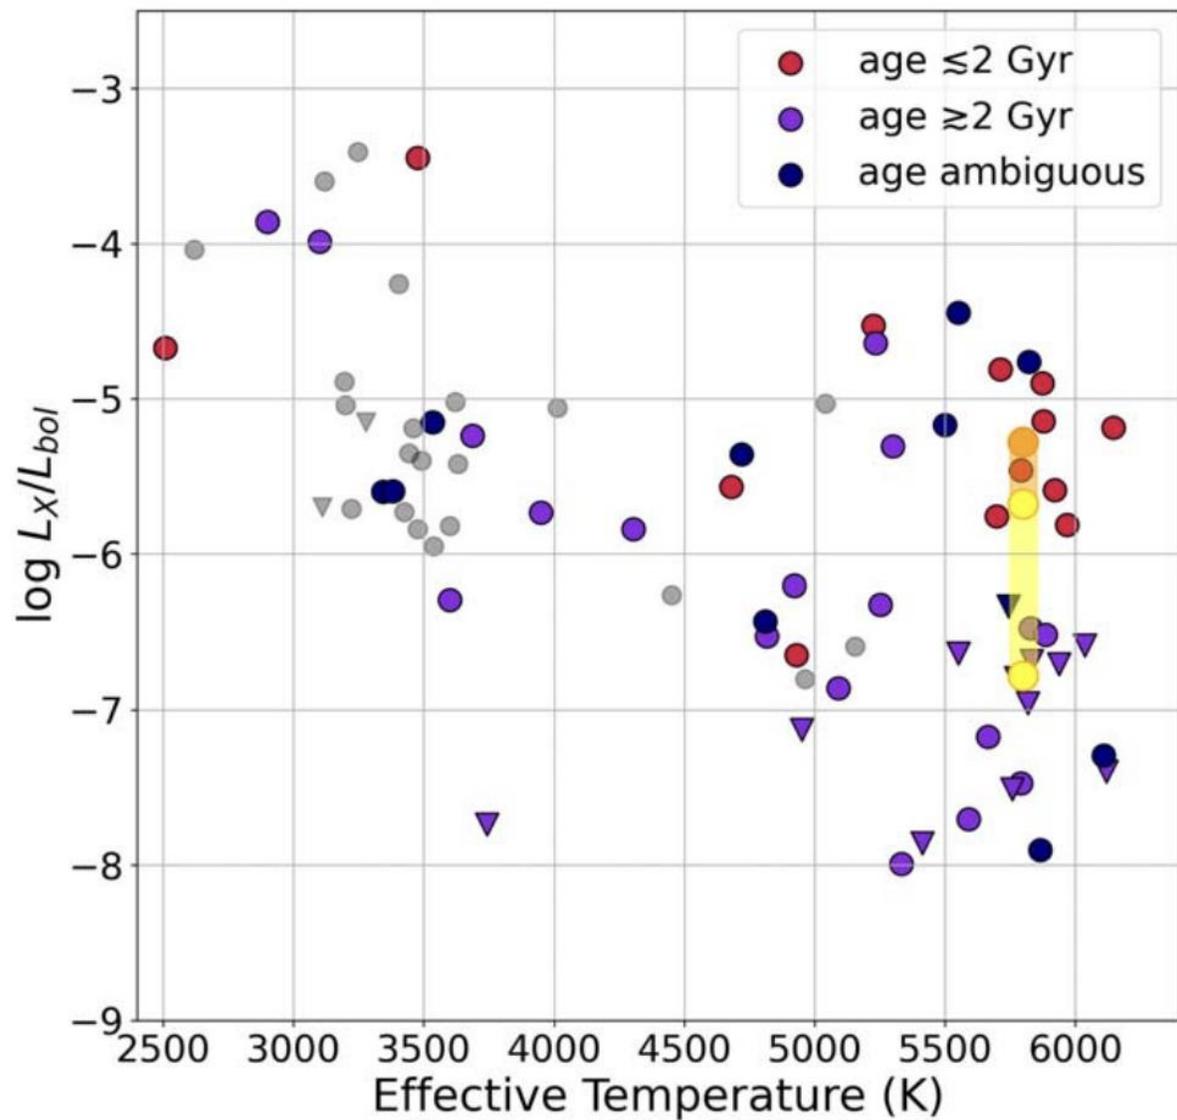

hotter than
the Sun

Sun-like

cooler than
the Sun

Brown et al. (2023)

Solar environment analog is likely conservative

Can *probably* have harsher X-ray environments and still retain a planetary atmosphere

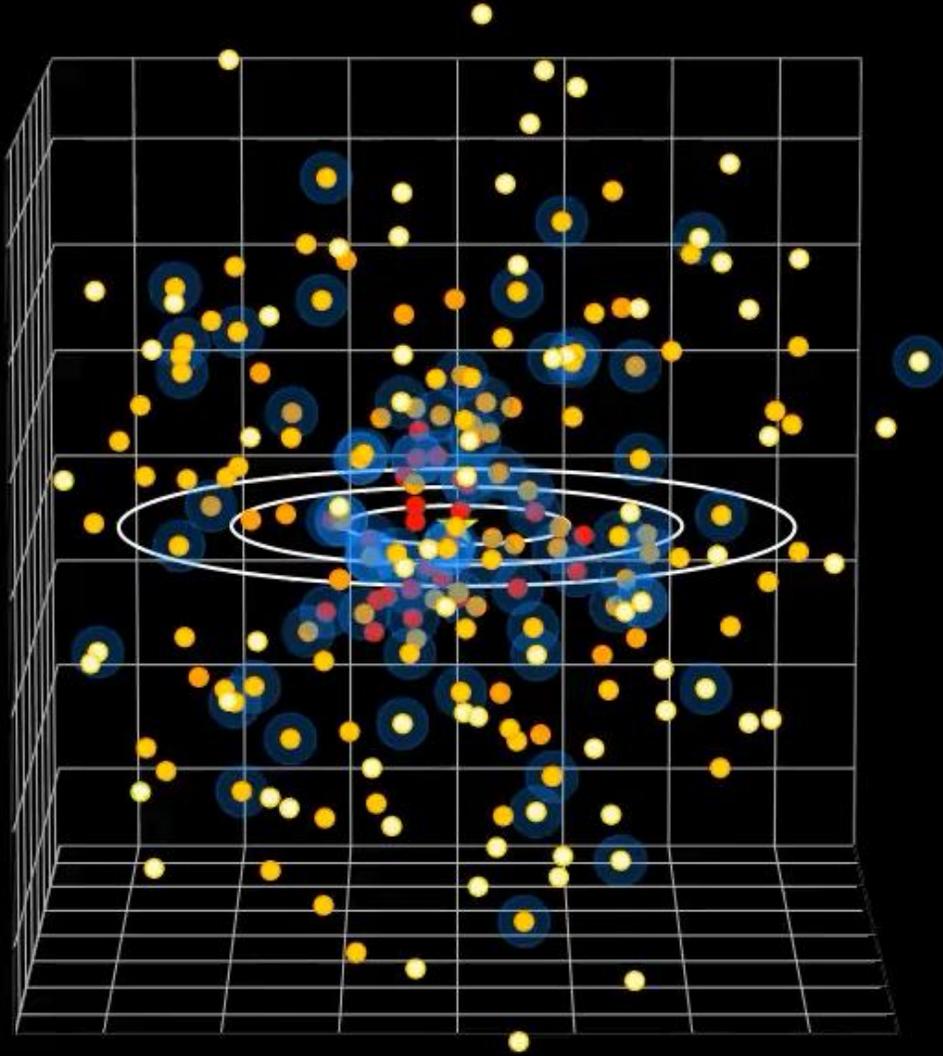

How much harsher? **Unknown**

Is too little X-ray flux detrimental to planetary atmospheres? **Unknown**

Table 8. Potential HWO Target Stars with Solar-Like L_X/L_{bol} Ratios

Star Name	Spectral Type	Age (Gyr)	Sun Comparison	HWO Tier
η Crv	F2V	<2	early	C
ξ Oph	F2V	unknown	modern	C
ν Phe	F9V	~ 3	<modern min	B
β Vir	F9V	~ 3	modern	C
LHS 237	F9V	unknown	<modern min	none
LHS 208	G0V	~ 3	<modern min	B
ι Per	G0V	~ 4	<modern min	A
ρ CrB	G0V	~ 11	<modern min	B
GL 672	G0V	~ 12	<modern min	C
47 UMa	G0V	~ 6.5	modern	A
β Com	G0V	<2	modern,early	A
GL 311	G1.5V	<2	early	B
ζ^1 Ret	G2V	<2	early	A
GL 327	G3V	<2	early	C
51 Peg	G5V	~ 7	<modern min	none
GJ 777A	G6IV	~ 13	<modern min	B
HD 140901	G7IV	~ 3	early	C
82 Eri	G8V	~ 6	<modern min	B
55 Cnc A	G8V	~ 9.5	modern	C
GL 451A	G8V	~ 5	<modern min	C
70 Oph AB	K0V+K5V	~ 6	early	B
GL 892	K3V	~ 11	modern	A
GL 783	K3V	~ 7	modern	B
GL 183	K3V	~ 2	modern	B
LHS 1875	K3V	<3	early	C
GL 570A	K4V	<3	early	A
61 Cyg AB	K5V+K7V	~ 6	early	A
GL 570 BC	M1.5V+M3V	<3	early	none
Kapteyn's Star	M2V	~ 11	<modern min	none

Blue halos show stars with at least one *Chandra* or *XMM* observation

Only **~1/3** of the stars that are of high interest to the HWO community

Thank you!
