Chandra X-ray Center

AHELP for CIAO 3.4　　　　　　　**_NARGS**　　　　　　　Context: slangrtl

Jump to: Description Example See Also

Synopsis

The number of parameters passed to a function

Syntax

```
Integer_Type _NARGS
```

Description

The value of the _NARGS variable represents the number of arguments passed to the function. This variable is local to each function.

Example

This example uses the _NARGS variable to print the list of values passed to the function:

```
define print_values ()
{
   variable arg;

   if (_NARGS == 0)
     {
        message ("Nothing to print");
        return;
     }
   foreach (__pop_args (_NARGS))
     {
        arg = ();
        vmessage ("Argument value is: %S", arg.value);
     }
}
```
