

AHELP for CIAO 3.4

atof

Context: [slangrtl](#)*Jump to:* [Description](#) [Example](#) [See Also](#)

Synopsis

Convert a string to a double precision number

Syntax

```
Double_Type atof (String_Type s)
```

Description

This function converts a string *s* to a double precision value and returns the result. It performs no error checking on the format of the string. The function `_slang_guess_type` may be used to check the syntax of the string.

Example

```
define error_checked_atof (s)
{
  switch (_slang_guess_type (s))
  {
    case Double_Type:
      return atof (s);
  }
  {
    case Integer_Type:
      return double (integer (s));
  }
  perror ("%s is not a double", s);
}
```
