

AHELP for CIAO 3.4

chdir

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Change the current working directory.

Syntax

```
Integer_Type chdir (String_Type dir)
```

Description

The `chdir` function may be used to change the current working directory to the directory specified by `dir`. Upon success it returns zero; however, upon failure it returns `-1` and sets `errno` accordingly.
