

AHELP for CIAO 3.4

make_printable_string

Context: [slangrtl](#)

Jump to: [Description](#) [See Also](#)

Synopsis

Format a string suitable for parsing

Syntax

```
String_Type make_printable_string(String_Type str)
```

Description

This function formats a string in such a way that it may be used as an argument to the eval function. The resulting string is identical to str except that it is enclosed in double quotes and the backslash, newline, and double quote characters are expanded.
