

 AHELP for CIAO 3.4

set_slang_load_path

Context: [slangrtl](#)

Jump to: [Description](#) [Example](#) [See Also](#)

Synopsis

Set the value of the interpreter's load-path

Syntax

```
set_slang_load_path (String_Type path)
```

Description

This function may be used to set the value of the delimiter-separated search path used by the `evalfile` and `autoload` functions for locating files.

Example

```
public define prepend_to_slang_load_path (p)
{
  variable s = stat_file (p);
  if (s == NULL) return;
  if (0 == stat_is ("dir", s.st_mode))
    return;

  variable d = path_get_delimiter ();
  set_slang_load_path (strcat (p, d, get_slang_load_path ()));
}
```

Some applications may not support the built-in load-path searching facility provided by the underlying library.
