

AHELP for CIAO 3.4

set_struct_fields

Context: [slangrtl](#)*Jump to:* [Description](#) [Example](#) [See Also](#)

Synopsis

Set the fields of a structure

Syntax

```
set_struct_fields (Struct_Type s, ...)
```

Description

The `set_struct_fields` function may be used to set zero or more fields of a structure. The fields are set in the order in which they were created when the structure was defined.

Example

```
variable s = struct { name, age, height };  
set_struct_fields (s, "Bill", 13, 64);
```
