

*AHELP for CIAO 3.4*

setuid

Context: [slangrtl](#)*Jump to:* [Description](#) [See Also](#)

Synopsis

Set the user-id of the current process

Syntax

```
Int_Type setuid (Int_Type id)
```

Description

The setuid function sets the effective user-id of the current process. It returns zero upon success, or -1 upon error and sets errno appropriately.

This function is not supported by all systems.
