

*AHELP for CIAO 3.4*

strlow

Context: [slangrtl](#)*Jump to:* [Description](#) [Example](#) [See Also](#)

Synopsis

Convert a string to lowercase

Syntax

```
String_Type strlow (String_Type s)
```

Description

The strlow function takes a string s and returns another string identical to s except that all upper case characters that comprise s will be converted to lower case.

Example

The function

```
define Strcmp (a, b)
{
    return strcmp (strlow (a), strlow (b));
}
```

performs a case-insensitive comparison operation of two strings by converting them to lower case first.
