AHELP for CIAO 3.4

strtrim_end

Context: slangrtl

Jump to: Description See Also

Synopsis

Remove trailing whitespace from a string

Syntax

```
String_Type strtrim_end (String_Type s [,String_Type w])
```

Description

The strtrim_end function removes all trailing whitespace characters from the string s and returns the result. The optional second parameter specifies the set of whitespace characters. If the argument is not present, then the set defaults to " \t\r\n".
