

*AHELP for CIAO 3.4***xsdisk**Context: [sherpa](#)*Jump to:* [Description](#) [Bugs](#) [See Also](#)

## Synopsis

Disk model. XSpec model.

## Description

The spectrum from an accretion disk, where the opacities are dominated by free–free absorption, i.e. the so-called blackbody disk model. Not correct for a disk around a neutron star.

### xsdisk Parameters

Number	Name	Description
1	accrate	accretion rate in Eddington Luminosities
2	NSmass	neutron star mass in solar mass units
3	Rinn	inner disk radius in gravitational (= 3 * Schwarzschild) radii; do not change this from 1
4	norm	$2 \cos(i)/d^2$ , where $i$ is the inclination of the disk and $d$ is the distance in units of 10 kpc

This information is taken from the [XSpec User's Guide](#). Version 11.3.1 of the XSpec models is supplied with CIAO 3.2.

## Bugs

For a list of known bugs and issues with the XSPEC models, please visit the [XSPEC bugs page](#).
