Synopsis

Modified blackbody disk model. XSpec model.

Description

A modified blackbody disk model. The spectrum from the inner region of an accretion disk where the viscosity is dominated by radiation pressure.

xsdisko Parameters

Number	Name	Description
1	accrate	accretion rate in Eddington luminosities
2	NSmass	central mass in units of solar mass
3	Rinn	inner disk radius in gravitational (= 3 Schwarzschild) radii
4	alpha	viscosity
5	norm	$\cos(i)/d^2$, where i is the inclination of the disk and d is the distance in units of 10 kpc

This information is taken from the [XSpec User's Guide](#). Version 11.3.1 of the XSpec models is supplied with CIAO 3.2.

Bugs

For a list of known bugs and issues with the XSPEC models, please visit the [XSPEC bugs page](#).
