

asol

Abbreviated name for the aspect solution data products. The filename begins with "pcad" and contains the start time in seconds for which the asol file applies; e.g. "pcadf079384137N002_asol1.fits".

This data product is found in the "primary" directory, although it was originally distributed in the "secondary/aspect" directory. See the aspect dictionary entry for more info.
