

Firstlook

Firstlook is quick-access GUI that gives a user an orderly view of the Chandra standard data products by reading the observation index file (OIF) provided with all Chandra data packages (or created with mk_{oif}). The firstlook icons can then be used to inspect the data.

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
60 Garden Street, Cambridge, MA 02138 USA.
