flt

Abbreviated name for the Good Time Interval (GTI) data product, which is created by the pipeline. This data product is found in the "primary" directory and contains a record of the GTIs; this information is also stored in some of the other data products as extensions (use "`dmlist <file> blocks`" to view the extensions or "blocks").

For more infomation, see the GTI dictionary entry or the Data Products Guide.

The Chandra X-Ray Center (CXC) is operated for NASA by the Smithsonian Astrophysical Observatory.
60 Garden Street, Cambridge, MA 02138 USA.
