

S-lang-related Bugs: save_state

Bugs

1. *The Sherpa save_state command fails when one already has a default state file.*

```
sherpa> save_state
sherpa> save_state
/home/username/.sherpa-state-rc could not be opened
save_state;
```

Workaround:

remove the existing file before saving:

```
sherpa> $ rm /home/username/.sherpa-state-rc
sherpa> save_state
sherpa>
```

2. *save_state() does not save the sherpa.deleteframes or sherpa.con_levels values.*
